1. Product Overview

The referenced machine family is built for continuous industrial duty and covers ride-on and walk-behind configurations for different floor areas.

2. Key Specifications

Each configuration is available with brush-assisted cleaning, an integrated battery pack and a recovery tank sized for a full working shift.

3. Application Scenarios

Typical installations are production halls, distribution centres, workshops, parking structures and public buildings with large hard-floor areas.

4. Service and Support

Pre-sales consulting, spare parts supply and warranty service are provided for both domestic and overseas customers.
